The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol ➡ (meaning "CONTINUED"), or the symbol ▼ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole ➡ signifie "A SUIVRE", le symbole ▼ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

PREFACE

At the request of a great many users of this Code there has been added an eight-page supplement and a few changes made in the body of the book. Copy of supplement and list of corrections having been sent to every user of the code you are quite safe in making general use of any code word herein.

In the supplement at back of book all code words begin with "Un," thus preventing any danger of conflicting with the original book in which there are no code words beginning with "U."

In making up this code and supplement, care was taken to guard against similarity of words and bad combinations of telegraphic characters, but to prevent errors it is necessary that the code words be plainly written.

One distinct feature of this Code is the fact that no code word contains less than five letters and none more than nine.

Where a dash "—" occurs in the middle of a sentence the missing word or words should follow in proper order immediately after the code word.

Where a word or letter appears in parenthesis () it is understood that the phrase may be used with or without such word or letter or substituted by some other.

The more familiar you are with this code the more value you will get out of it. A little time spent now in carefully looking through it will save you time and money later on.

If it is useful to you recommend it to others.

All words and phrases shown in italics are corrections in this edition and are included in supplement No. 9. See that your correspondents have copy of supplement and that former editions are corrected.
